Product Name: Davidson's Safest Choice
Pasteurized Shell Eggs
UPC 7-63514-51420-2

Davidson's Safest Choice Pasteurized Eggs are available nationally to all retailers. Our eggs are pasteurized in their shells using an FDA approved patented process that destroys salmonella bacteria and avian viruses that may be found inside or outside of eggs. Davidson's eggs are safe to eat in any recipe, cooked any style or even raw. The FDA and CDC recommend pasteurized eggs be used for eggs served to highly susceptible populations or where both the yolk and/or white of the eggs are not cooked until firm.

For information contact: National Pasteurized Eggs at 1-800-410-7619.
